This data comes from the VHPA's copy of the Army Goldbook database that contains a monthly report by aircraft of hours flown, accumulative hours on the airframe, and the unit. Data from the VHPA's Helicopter database that contains details from accident reports, battle damage reports (including crew injuries) plus aircraft disposition (repaired or removed from inventory). The 'From' unit identifies the previous unit prior to being assigned to this 7/17<sup>th</sup> Cav unit. The 'To' unit identified the unit who received the aircraft from this 7/17<sup>th</sup> Cav unit. The 79<sup>th</sup> Transportation Company (Aircraft Direct Support) was located at Qui Nhon. The 388<sup>th</sup> Transportation Company (Aircraft Direct Support) was located at Vung Tau. LTI means Lost To Inventory. The Army used this term to mean the aircraft was destroyed and therefore removed from inventory. The 355 AVN CO 'unit' is thought to be a code rather than an actual unit. The code seems to indicate that the aircraft was either returned to the Army for reissue or returned to CONUS for inspection, repair, and/or reissue. ARADMAC is the acronym for Army Aeronautical Depot Maint Center and generally denotes that this aircraft was repaired by the 1<sup>st</sup> Transportation Battalion resident on the USNS Corpus Christie Bay.

This data comes from the VHPA's copy of the Army Goldbook database that contains a monthly report by aircraft of hours flown, accumulative hours on the airframe, and the unit. Data from the VHPA's Helicopter database that contains details from accident reports, battle damage reports (including crew injuries) plus aircraft disposition (repaired or removed from inventory). The 'From' unit identifies the previous unit prior to being assigned to this 7/17<sup>th</sup> Cav unit. The 'To' unit identified the unit who received the aircraft from this 7/17<sup>th</sup> Cav unit. The 79<sup>th</sup> Transportation Company (Aircraft Direct Support) was located at Qui Nhon. The 388<sup>th</sup> Transportation Company (Aircraft Direct Support) was located at Vung Tau. LTI means Lost To Inventory. The Army used this term to mean the aircraft was destroyed and therefore removed from inventory. The 355 AVN CO 'unit' is thought to be a code rather than an actual unit. The code seems to indicate that the aircraft was either returned to the Army for reissue or returned to CONUS for inspection, repair, and/or reissue. ARADMAC is the acronym for Army Aeronautical Depot Maint Center and generally denotes that this aircraft was repaired by the 1<sup>st</sup> Transportation Battalion resident on the USNS Corpus Christie Bay.
